SUMMARY

Full Stack Java Developer with 3.5 years of experience designing and developing scalable enterprise applications using Java, Spring Boot, Microservices, React.js, REST APIs, and MySQL. Experienced in building secure and high-performance applications across both frontend and backend layers, including responsive UI development, API integrations, authentication workflows, and distributed systems. Skilled in developing production-grade applications, optimizing performance, and collaborating across cross-functional agile teams.

SKILLS

Languages: Java, SQL, JavaScript

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, JWT Authentication

Frontend: Next.js, React.js, JavaScript, HTML5, CSS3, Responsive UI, Redux/Context API, Component-Based Architecture

Database: MySQL, SQL Server, DBMS

Tools: Git, GitHub, Jenkins, Postman, Jira, Maven

Concepts: CI/CD, Distributed Systems, API Integration, Performance Optimization, Agile/Scrum

Cloud/DevOps: Basic Docker, AWS Fundamentals

EXPERIENCE

Software Developer — FindiBankit

Feb 2025 – Present

- Designed, developed, and maintained scalable backend applications using Java, Spring Boot, Spring Security, Hibernate, and MS SQL Server for enterprise financial and booking platforms.
- Developed and integrated 35+ RESTful APIs for user authentication, authorization, booking management, payment processing, role-based access control (RBAC), and third-party integrations.
- Integrated external APIs for payment gateways, travel booking, and gift card services, ensuring secure communication and reliable transaction processing.
- Automated recurring business workflows using Spring Scheduler, reducing manual operational effort by 70% and improving system reliability.
- Collaborated with frontend developers to integrate backend services with React.js, delivering responsive and production-ready applications.
- Optimized SQL queries, improved API performance, resolved production issues, and participated in Agile ceremonies including sprint planning, code reviews, and deployments.

Backend Engineer — Emo Matrix

Dec 2023 – Jan 2025

- Developed scalable backend services using Java, Spring Boot, Spring Security, Hibernate, and MySQL for communication, analytics, and enterprise business applications.
- Designed and implemented 60+ REST APIs for authentication, user management, authorization, reporting, and real-time communication.
- Implemented secure authentication using JWT and role-based access control (RBAC) to protect enterprise applications.
- Integrated third-party services including Agora SDK, Razorpay, and Firebase APIs to support real-time communication, payment processing, and user authentication.

- Improved application performance by optimizing SQL queries, implementing exception handling, and debugging production issues to enhance system reliability.
- Collaborated with cross-functional teams following Agile methodology, Git-based version control, and code review best practices.

Software Engineer — Paytm

Nov 2022 – Nov 2023

- Contributed to enterprise KYC and customer onboarding systems by validating backend services, REST APIs, and database workflows.
- Performed API testing, SQL validation, regression testing, and production verification to ensure high-quality software releases.
- Worked closely with development teams to identify, reproduce, and resolve application defects across distributed systems.
- Utilized Jenkins, Kibana, Redash, and SQL for CI/CD support, log analysis, production monitoring, and release validation.

PROJECTS

Flight Ticket Booking Platform — *React.js, REST APIs, Spring Boot, MSSQL*

- Developed a real-time flight booking platform supporting flight search, seat selection, baggage management, and booking workflows.
- Integrated 25+ REST APIs for booking, pricing, and seat management.

IRCTC Service — *React.js, REST APIs*

- Developed ticket booking dashboards with PNR status, train schedules, and transaction management.
- Integrated secure backend APIs and reusable UI components to improve booking performance and user experience.

Insurance Services — *React.js, REST APIs, Spring Boot, MSSQL*

- Developed insurance management modules supporting policy issuance, claims, and renewals.
- Designed 10+ REST APIs and automated scheduled workflows using Spring Scheduler, reducing manual effort by 40%.

Gift Card Platform — *React.js, REST APIs, Spring Boot, MSSQL*

- Built a secure gift card management platform supporting issuance, redemption, and transaction processing.
- Developed 10+ REST APIs, integrated third-party services, and automated scheduled jobs reducing manual effort by 70%.

GoodPeople — Website / Play Store — *REST APIs, Spring Boot, MSSQL*

- Developed scalable backend services supporting 5K+ concurrent users using Spring Boot and MySQL.
- Built 60+ REST APIs and integrated Agora SDK and Razorpay for real-time communication and secure payments.
- Implemented JWT authentication, RBAC, and exception handling to improve application security and reliability.

LiveCall — Play Store — *REST APIs, Spring Boot, MSSQL*

- Developed backend modules for call logging, analytics, monitoring, and reporting using Spring Boot.
- Implemented secure role-based access control and reporting dashboards, improving operational visibility by 35%.

ACHIEVEMENTS

- Google Kick Start 2021: Achieved Global Ranks of 3530 (Round E), 6131 (Round D), and 7507 (Round F).
- CodeChef: Rated 3-Star coder with 1026 Global Rank.
- HackerRank: Earned badges in Java, SQL, and Problem Solving.
- Letter of Appreciation — Emo Matrix.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

G.L. Bajaj Group of Institutions · 2018 – 2022
